Ben -

I just got word from the task order manager in Washington that they will be talking with Tetra Tech Monday regarding the statement of work for the New Mexico Nutrients project. The work will be placed as Technical Direction on Task Order 79, Task 5, Contract EP-C-08-004, which I finally figured out was the same contract that we conducted the Bedded Sediment task order.

This will be my last day of work prior to leaving on vacation returning Monday, 2 July 2012. However, I will be monitoring my email while out (to the bewilderment of my wife) to follow-up on an pending issues that should arise. If while out, if you should need to contact me please give me a call on my mobile or email me.

Cheers

Forrest B. John
